

### ABOUT TANDEM

## Treating Mental Health in Primary Care

Tandem enables PCPs and OB/GYNs to treat mental health within their existing scope of practice through a clinical decision support system (CDSS) purpose-built for primary care and women's health settings.

725K U.S. providers screen for anxiety and depression yet lack tools to deliver accessible care without relying on the mental health workforce. 50% of conditions go untreated, costing insurers \$14B+ annually in untreated maternal mental health alone.

Tandem turns screening into treatment in the same visit, reducing the 3 to 6 month wait time for access to a mental health clinician. CDSS-guided, insurance-covered digital interventions onboard patients immediately. Providers treat within their scope of practice and generate new annual revenue per provider through either fee-for-service billing or value-based care incentives.

### CORE CAPABILITIES

#### Mental Health Clinical Decision Support for PCPs and OB/GYNs

- CDSS protocols for PCP and OB/GYN scope of practice
- Risk assessment and evidence-based treatment algorithms
- Validated screening: PHQ-9, GAD-7, EPDS with auto-flag thresholds

#### Digital Health Platform & Integrations

- **EHR/EMR Integrations:** interoperable across 8 major EHR systems, designed to fit your existing clinical workflows.
- **Tandem Clinical:** clinician workspace with embedded CDSS guidance, risk stratification, and treatment protocols at the point of care.
- **Practice Hub:** collaborate with billing, operations, and clinical leadership to track outcomes and revenue across fee-for-service and value-based care.

#### Patient Experience

- **Tandem Care:** patient-facing app delivering personalized, evidence-based digital therapy and care navigation.
- **Community Intelligence:** personalization engine for patient retention across diverse markets, from rural health to high-density populations.
- **Pilot Outcomes:** 94% engagement among diverse people; 75% 12-week retention (3x industry average).

### PSC

7A20, 7A21, B599, DA01, R408, R410, R425, R499, R699, Q201, Q403, Q507, Q509, Q519, Q528, Q533, U099

### HEALTH SYSTEM PARTNERS

- Public-university health systems
- VA clinics and medical centers
- State Medicaid Agencies
- State and county-managed FQHCs
- Indian Health Service (IHS)
- Department of Defense (DoD)
- HRSA-funded community health centers

### PAST PERFORMANCE

- **Slauson & Co.**  
Institutional Investor
- **Tiger Global Management Impact Ventures**  
Nondilutive grant for pilot
- **NIH SBIR with UTHSC-SA**  
Submission highly scored; awaiting decision (government pause)
- **Pilot program**  
\$50K deployed for text-based mental health programming

### LEADERSHIP

**Sheila Pande, MPH**  
Founder & CEO

**Dr. Angela Skrzynski**  
Medical Director

**Bryan Dennstedt**  
Chief Technology Officer

### WHY TANDEM · DIFFERENTIATORS

- **Expanding care capacity.** PCPs and OB/GYNs treat mental health within their scope of practice, cutting the 3 to 6 month wait for specialty care.
- **Closes the screening-to-treatment gap.** USPSTF, ACOG, and AAP screening mandates pair with point-of-care treatment in the same visit.
- **Workflow-native, not workforce-dependent.** Integrates with existing EHR and staff. No new mental health hires or external referrals required.
- **Built for the populations you serve.** Culturally responsive care validated across rural, FQHC, public-university, IHS, and VA populations.
